

## **BOF Renaming**

**As of February 5, 2004 BOF's will now be referred to as Charter Discussion BOFs.**

BOFs (Birds of a Feather) have been a part of GGF since its inception. These meetings have been held for a variety of reasons such as to discuss new group formation and share experiences or to explore a particular area of grid computing. These type of meetings will continue to be conducted in this manner.

**Also AD-Hoc meetings will now be scheduled only onsite (if there is meeting space is available) at a GGF meeting. Please note that these meetings will not be governed by GGF and will not be scheduled before a GGF meeting begins.**

AD-Hoc meetings may be held for various reasons such as trying to gather individuals to create a charter discussion group or just individuals getting together to talk about a certain subject. No agenda is required but is encouraged.
