This OPEN document will not be filed. It is being kept active.

## Meeting about Meetings\OGF

Project	DFDL 1.0
Meeting Date	12-Jul-11 (Tues)
Meeting Time	15:00 - 16:00

Created by Steve Hanson on 09-Mar-11

Last Modified by Steve Hanson on 13-Jul-11

## OGF DFDL Working Group Call , 12 July 2011

### Agenda

**Prepare** for your meeting by describing the objectives (both immediate and long-term, if appropriate) of the meeting; and describe key details.

### Open Grid Forum : Data Format Description Language Working Group

#### OGF DFDL Working Group Call , 12 July 2011

##### 1. Spec issues from IBM (continued)

As implementation has progressed, a number of issues have been spotted in the DFDL 1.0 spec by the IBM implementation team. Remaining items for resolution.

13.6.Should textStandardDecimalSeparator ignored when the logical type is not decimal/float/double?

13.6.1.1. Erroneously mentions sigDigits in reference to the BNF for textNumberPattern.

13.6.1.1. Formatting. Uses terms 'minimum/maximum integer/fraction digits' but does not define them.

13.9. Should state that textBooleanTrue/FalseRep properties are used after trimming when parsing, and before padding when unparsing. If lengthKind is explicit or implicit and either textPadKind or textTrimKind is none then the properties must have the same length else schema definition error.

13.16. Nil literal character. When representation is binary, the encoding property is not used, which implies that a nil value must only contain DFDL hex literals (%rXX;)

13.16. Clarify nilKind 'literalCharacter' and 'literalValue' and whether nil test is applied before or after trimming.

15. Using a discriminator to resolve each branch of a choice with a very large number of branches has a performance impact as each branch must be evaluated in turn. In cases where the name of the branch element is known or derivable in advance (ie, each discriminator expression is of the form {...tag eq "elem1"} or similar) then consider adding a property to dfdl:choice that provides an expression that returns a QName, being the name of the branch element. Note: IBM MRM has something like this.

16.1. Revise entire section.

16.2. State it is a processing error if the stop value is missing when parsing.

##### 2. Spec issues from Mike Beckerle

A number of issues have been spotted by Mike. Some have been resolved by action 139 below, but others remain.

See separate e-mail.

## Minutes

### Meeting Minutes

**Reflect** on your meeting as you record all topics and issues discussed , and any tabled conversations . What went well, or what would you do differently next time? Document those so others can take advantage of your learning .

### Open Grid Forum : Data Format Description Language Working Group

#### OGF DFDL Working Group Call , 12 July 2011

#### Attendees

Mike Beckerle (Deloitte)  
Steve Hanson (IBM)

#### Apologies

(Delayed start at 15:30 UK due to calendaring issues.)

#### 1. Spec issues from IBM (continued)

15. Using a discriminator to resolve each branch of a choice with a very large number of branches has a performance impact as each branch must be evaluated in turn. In cases where the name of the branch element is known or derivable in advance (ie, each discriminator expression is of the form `{..}tag eq "elem1"` or similar) then consider adding a property to `dfdl:choice` that provides an expression that returns a QName, being the name of the branch element. Note: IBM MRM has something like this.

Agreed that such a 'dispatch' mechanism would solve the performance problem, and would avoid processors having to detect and optimise certain discrimination usage patterns. IBM proposal above is simple and enables discrimination using a single property on the choice, but might involve a quite complex expression if the tag and the QName are of different types, and does not work if the children of the choice are sequences. It also allows the addition of more branches without worrying about setting any properties. A more powerful proposal is to provide a property on the child which takes the value of the tag but this means you, but this obviously involves setting a property per branch. Action 145 raised to carry this on.

#### Meeting closed

16:00 UK

#### Next call

Tues 19th 15:00 UK

## Create Action Items

Record the to-do's and individuals assigned by entering the appropriate information in the form below . Press the "Create Action Items" button to create specific to do's that can be tracked in the assignee's Work for Me views. " All Action Items will be tracked in the Action Items and Other Meeting Documents tab .

## Action Items and Other Meeting Documents

View: ResultDocs

Next action: 145

### Actions raised at this meeting

No	Action
145	<a href="#">Provide a 'dispatch' way of discriminating a choice for better performance of the envelope/payload use case .</a> <a href="#">12/7: See minutes. Need to choose a proposal and flesh out.</a>

### Current Actions :

No	Action
111	<b>Daffodil DFDL parser (Bob, Joe)</b> 11/08: Bob and Alejandro described the new implementation that they have developed. It is a new code base and is not based on the Deffudle prototype. It is written in scala and implements approximately 80% of the features in the public comments draft of DFDL V1. Alejandro will send a list of the features not implemented. We discussed the scenarios that motivated the development which was to extract data from various sources and transform into canonical formats. Bob offered to make Daffodil available for the WG to assess the functionality. IBM WG members will get approval the company to allow them to receive Daffodil. Bob raised the question that if Daffodil becomes the public implementation of DFDL then we will need to work out how that would be funded and managed. It would be helpful if IBM test cases were available to Daffodil. IBM will investigate 25/08: Alejandro had sent a list of the functions that he has implemented and Steve responded indicating the extra functions he thought were essential. Since then Alejandro has implemented some of the missing functions, such as escape schemes, pre-defined variables, binary decimal numbers, etc, and will update his list. Bob is planning to make the parser available on the internet to allow testing. His organisation is being reorganised and he doesn't know what the priority of Daffodill will be so it is essential that we move quickly. It would help if IBM could indicate its support for Daffodil in some semi-formal way.

01/09: Alejandro updating Daffodil to include escape schemes, unordered sequences and ignoreCase.  
Daffodil being placed under formal source control in anticipation of external release.  
Bob has a start October deadline to create a report on what has been done for his sponsors.  
It would be great if we could get Daffodil on the web and have run some IBM tests so it could be highlighted at OGF 30 at end October.

08/09: Alejandro is marking up Spec draft 42 to indicate which features Daffodil implement.  
Bob expects Daffodil to be available on the web soon.

15/09: Alejandro had indicated in the specification which functions were implemented in Daffodil. Steve had reviewed and identified which function need to be implemented and which could be considered optional (see action 099). Alejandro is implementing the missing core functions. There was some discussion about the limitations on unordered groups. (stop value and expression not supported). It was agreed that it should be a schema definition error if dfdl:occursCountKind is 'stopValue' on any element within an unordered sequence and a floating element.

22/09: not discussed  
29/09: not discussed

06/10: Alejandro has left NCSA. Bob is making the case for continuing and having a replacement. Bob to agree with Steve what can be said at OGF30.

13/10: Bob still progressing project funding and making Daffodil publically available.

10/11: NCSA internal & sponsor (US National Archive in Washington DC - Electronic Records Administration) reviews passed. NCSA have new resource allocated - Joe Futrelle.  
Bob has started open source paperwork. ETA end December.

17/11: Joe has started coming up to speed with Daffodil. Bob is waiting for signoff from the university to open source the code.

24/11: not discussed

01/12: Joe is becoming familiar with the code. Waiting for university to give permission to make available.

08/12: Disclosure process in progressing. Bob has permission to make the web page available so hopefully that will be soon.  
The US National Archive have an article on their website about DFDL. Unfortunately it is a little out of date.

15/12: Hope to get permission to make the source code available within days. Web demo page will be available when resources have been identified.

22/12: An internal demonstration web page has been made available. Initial testing highlight some problems. Joe investigating.

12/01: Web site has been move to a public URL <http://daffodil.ncsa.uiuc.edu/>. Joe thinks there are multiple problems that will show up when he can run the test cases.

19/01: Joe has had little time to work on Daffodil. Without significant research into the code it is difficult to know how compliant daffodil is. Discussed if there are ways the WG could help. Suggestions

- Help review the code
- Review the Daffodil test cases for correctness
- Simplify the IBM test cases to be 'unit tests'

Alan to ask for permission to review test cases and possibly simplifying the IBM test cases

26/01: Joe has not had any time to work on Daffodil. We briefly discussed if it was possible to use XSLT to transform test cases so they didn't use defaulting but it didn't seem possible and effort would be better targetted at the Daffodil code.

Alan had asked for permission to view test cases and subsequently heard that it has been given.

02/02: Joe will send the Daffodil test cases for Alan to review.

09/02: Alan has received the test cases and will feed back comments. Joe is looking at support for the default format

16/02: Alan has corrected some of the daffodil test cases and identified common problems

23/02: No update

02/03: No progress

09/03: No progress

30/03: From Joe: "The current status of my work is that, having identified issues with the schema parser, I am now going to attempt to independently assess the processors. That is: I am going to hand-configure the processors in a series of tests so that I can see what they can parse and what they can't. In the process I may be able to refactor them so that they are

	<p>less closely coupled to the schema parser, setting the stage for a new schema parser implementation."</p> <p>13/04: Joe has analysed the schema parser part of Daffodil - it is looking for annotations in wrong place, scoping are rules broken, it is using wrong property names. Needs a rewrite. But the parser itself is in better shape. Unfortunately Joe is leaving NCSA in 4-5 weeks time. Net is that any Daffodil on the web will be a partial, non-conformant implementation. Must make it very clear that this is the case. Also unlikely that Joe will be replaced. Joe will see whether there is any chance to work on DFDL in his new job.</p> <p>04/05: Bob will create some white papers on what to do when implementing a DFDL parser, on the state of the current Daffodil implementation, and on lessons learned. The former is of particular interest as the IBM implementation is throwing up some interesting design points and a couple of difficulties in the area of empty/missing/nil/default processing.</p> <p>18/05: No update</p> <p>01/06: No update</p> <p>08/06: No update</p> <p>15/06: No change in status. Bob wants to spread the new wider to find contributors to Daffodil, as NCSA does not have the qualified staff available, and no new hires are likely. US NSA have shown an interest in contributing. Steve has invited them to future DFDL WG calls.</p> <p>28/06: No update</p> <p>05/07: Adam Fox (US Navy) has been looking at the Daffodil parser, to see where the holes are in respect to the formats they are interested in. Alonza Mumford (US NCSC) will be doing the same this week for his formats. Need holistic view from the various US DoD projects as to the missing function. DoD have also suggested setting up a community source project so that any future changes to Daffodil parser are visible to the wider community.</p> <p>12/07: Update from Mike. NCSA and NSA discussing how to complete the Daffodil parser in a timely manner.</p>
123	<p><b>DFDL tutorial (Steve)</b></p> <p>13/10: Draft of first 3 chapters has been written and will be distributed to WG</p> <p>10/11: Posted to grid forge here (<a href="http://forge.gridforum.org/sf/go/doc16106?nav=1">http://forge.gridforum.org/sf/go/doc16106?nav=1</a>), work continuing at IBM to define a standard example-based chapter framework and to author additional chapters. Contributors welcome!</p> <p>17/11: Steve, Stephanie and Alan had a meeting to discuss the best structure for the tutorial and decide which examples to use throughout. The meeting raised more questions. Further discussions will be held.</p> <p>24/11: The list of topics to be covered in the remaining lessons has been produced and a lesson template. Alan will write lesson 4</p> <p>01/12: Alan has started lesson 4 which covers fixed and variable fields and arrays.</p> <p>08/12: Alan has almost completed lesson 4. Will send out for review.</p> <p>15/12: First draft of lesson 4 is available for review. Alan to send to Bob and Joe.</p> <p>22/12: Alan has distributed drafts for tutorials on Basic Structure and Optional/Repeating elements. Please review</p> <p>12/01: Alan distributed a tutorial for choices and updated the others. Alan and Steve reviewed them and updated versions will be sent soon. Should start on the 'representation' tutorials soon.</p> <p>19/01: The tutorials for basic structure, optional/arrays and choices have be updated. Please review. The tutorial for text elements should be available soon.</p> <p>26/01: No comments received about 3 tuorials distributed last week. Alan is still working on Text representation.</p> <p>02/02: Steve has sent comments on three tutorials. Alan to send updated versions by the end of the week. Alan has also distributed the first part of the tutorial on text representation and would like feedback.</p> <p>09/02: Steve had reviewed tutorials 3,4,5 and updated versions have been distributed. Joe reviewed lesson on text elements.</p> <p>Main points. Using 'represented as text' is confusing. Examples are too cluttered. Suggest simple targeted examples but still build up to final complete schema</p> <p>23/02: New versions distributed and Steve has commented.</p> <p>02/03: Alan has published the final versions of tutorials 4,5,6 and is working on text respresentations. There was some discussion about the detail that needs to be covered. Should limit it to 'common usage' and refer to the spec for details of edge cases.</p>

	<p>09/03: Alan distributed an update to the text tutorial. Please review.</p> <p>30/03: Steve has spent half a day tidying up lessons 1 to 6 and has uploaded them as pdfs to gridforge. They are now more coherent, and many inconsistencies and errors fixed.</p> <p>Ownership of draft lessons (text properties, binary properties, advanced features) has been passed to Steve. Also need to make a schema available for the examples.</p> <p>13/04: Steve is working on the text properties tutorial.</p> <p>04/05: No progress</p> <p>18/05: No progress</p> <p>01/06: No progress</p> <p>08/06: No progress</p> <p>15/06: This is on hold until Steve clears up spec issues and other workload. Steph has looked at the later lessons, and noted that they are more direct compared to the more wordy earlier lessons.</p> <p>28/06: On hold.</p> <p>05/07: On hold.</p> <p>12/07: <a href="#">On hold</a></p>
124	<p><b>DFDL web content on OGF standards pages (Steve, Bob)</b></p> <p>13/10: no progress</p> <p>10/11: no progress</p> <p>17/11: Alan has looked at the OGF web pages and there aren't many standards listed. Some of the links point to very short primers rather than the specification</p> <p>...</p> <p>08/12: Alan to produce some information to be ready for when spec is approved. Still no word about is it was discussed/approved at OGF meeting</p> <p>15/12: no progress</p> <p>22/12: Steve has developed a summary web page for DFDL which will be sent to OGF when spec is approved.</p> <p>12/01: Not heard from Joel about updated OGF pages Alan to chase.</p> <p>Will also track other site updates: Wikipedia, IBM developerworks etc.</p> <p>19/01: Still no response from Joel.</p> <p>Other web site that need updating</p> <ul style="list-style-type: none"> <li>- IBM virtual XML</li> <li>- Defuddle</li> <li>- Wikipedia</li> <li>- Need google trawl for others</li> </ul> <p>Also need to make spec and tutorials more accessible on the web, eg in pdf and/or html format.</p> <p>26/01: Still not heard from Joel about OGF web pages.</p> <p>PDF versions of the Specification and tutorials have been uploaded to gridforge.</p> <p>02/02: A DFDL web page is available at <a href="http://www.ogf.org/dfdl">www.ogf.org/dfdl</a>. We need to update the IBM virtual XML and MCSA Defuddle pages. Will ask Mike Beckerle to update his DFDL page.</p> <p>09/02: Wikipedia DFDL page is available.</p> <p>23/02: All sites except Defuddle have been updated.</p> <p>02/03: NCSA web pages have been updated. The DFDL WG home page needs updating and should provide links to spec and tutorials.</p> <p>09/03: Steve has updated the DFDL WG home page and is in contact with Edinburgh University to update an old DFDL presentation. Would like to have a separate DFDL tutorial page to link to the individual lessons.</p> <p>30/03: Bob will chase the update of the old Defuddle web pages. IBM investigating conversion of spec and tutorials from pdf to html for usability from browsers.</p> <p>13/04: Bob still sorting out the Defuddle updates. IBM work to convert the spec to html has started.</p> <p>04/05: Jim Myers has updated the sourceforge download page but not the Defuddle home/overview pages, Bob will chase. IBM has converted the spec to html pages, needs some tidying before being made public.</p> <p>18/05: IBM aims to publish the web version by end June. Steve checking with OGF whether the web spec is a 'derivative work' in terms of the copyright notice, or can be considered an actual copy of the spec.</p> <p>01/06: Still waiting on status of web spec from OGF</p> <p>08/06: OGF have come back to us and said that it is ok to create a web version of the spec. If it is unchanged then it is a copy, otherwise it is a derivative work. Either way, the copyright</p>

	<p>covers this so there is not a problem. The web version is looking good, some minor tidy-up changes needed where formatting is not quite right. When IBM is happy with it, Steve will circulate to the WG for review.</p> <p>15/06: Ongoing</p> <p>28/06: Steve needs to take a final look at all the pages, get any problems fixed, then distribute to the WG</p> <p>05/07: Reviewed, some editorial changes needed, and a problem with the table numbers getting reset across pages. When these are fixed Steve will distribute.</p> <p><a href="#">12/07: Editorial changes made, fixing the table numbers and also XML indentation in examples.</a></p>
<b>132</b>	<p><b>Publishing DFDL xsd (Suman)</b></p> <p>08/12: Agreed that it should be made available. Suman has started the approval process in IBM</p> <p>15/12: no progress</p> <p>22/12: no update</p> <p>12/01: Suman is getting approval from IBM to publish.</p> <p>19/01: Waiting to get IBM approval to publish</p> <p>26/01: no update</p> <p>02/02: No update</p> <p>09/02: no update</p> <p>23/02: no update</p> <p>02/03: Suman is working through the IBM process to permit publication. There was discussion about what licence the XSD would be published under and how that would effect use in products. Suman to investigate</p> <p>09/03: No update</p> <p>30/03: Suman has sent information to IBM legal. Reminded him about the license issue.</p> <p>13/04: No update.</p> <p>04/05: IBM has permission to release the DFDL model xsds to WG members only, Suman has a couple more changes to make and will send to Steve for review. License clarification needed.</p> <p>18/05: Awaiting response from IBM legal. Suman will send Steve the model xsd for review.</p> <p>01/06:</p> <p>08/06: Awaiting response from IBM legal. Suman will send Steve the model xsd for review.</p> <p>15/06: Steve has received the xsds (there are three of them) and will review.</p> <p>28/06: Not reviewed yet</p> <p>05/07: Need to fully understand what WG members are able to do with it. The real usefulness is in other implementers being able to use the xsds to validate DFDL xsds so the license needs to reflect this.</p> <p><a href="#">12/07: No further progress</a></p>
<b>133</b>	<p><b>Make a set of default formats available (Suman)</b></p> <p>19/01: Suman expects some default formats to be ready by Feb 9th. Will need approval to publish</p> <p>26/01: Stephanie sent the defaults used by test cases to Suman</p> <p>02/02: no update</p> <p>09/02: no update</p> <p>23/02: no update</p> <p>02/03: Same as 132</p> <p>09/03: No update. Same license issue apply though.</p> <p>13/04: No update.</p> <p>04/05: IBM will make one default format available. Suman is working through the IBM process to permit publication.</p> <p>18/05: Awaiting response from IBM legal.</p> <p>01/06:</p> <p>08/06: Awaiting response from IBM legal. IBM also want to prove that the default format has the properties sensibly defined to plans to include in internal testing.</p> <p>15/06: No change.</p> <p>28/06: No change</p> <p>05/07: No change.</p> <p><a href="#">12/07: No change</a></p>
<b>136</b>	<p><b>Arrays with missing elements (Steve)</b></p>

	<p>There is a problem when there are empty/missing array elements with an index greater than minOccurs. For example:</p> <p>xs:element name="array" minOccurs=0, maxOccurs=10 lengthKind='delimited'</p> <p>Datastream: ,,,value3,value4</p> <p>InfoSet will contain:</p> <pre>array[1] = value3 array[2] = value4</pre> <p>This is because elements with an index greater than minOccurs are optional and so do not get defaulted.</p> <p>Unparsing this infoSet will produce:</p> <p>Datastream: value3,value4</p> <p>You could make the empty space (%ES;) the nil value which will work for simple elements but not for complex.</p> <p>InfoSet will contain:</p> <pre>array[1] = nil array[2] = nil array[3] = value3 array[4] = value4</pre> <p>23/02: Discussed options</p> <ol style="list-style-type: none"> <li>1. Changed definition of required for arrays to be 'required up to the last instance in the data stream of the array'</li> <li>2. add index to the element info item</li> </ol> <p>Steve to investigate if XDM uses an index.</p> <p>02/03: No progress</p> <p>09/03: No update</p> <p>30/03: Stephanie recognised the issue from IBM's WTX. Here, the solution was to provide an option so that the user explicitly chose whether the position in the array was significant, as it is not always and on output some users do not want defaults or blanks to appear. Not yet resolved.</p> <p>13/04: Steve has verified that XDM does not carry index information, but will check with IBM's W3C rep to see if that has ever been expressed as a requirement. Steve also said that the area of defaulting missing required elements on parsing (especially complex elements) is one that the IBM implementation team has raised some concerns about, so Steve and the team are looking at this area again. It is possible that the spec will change to clarify behaviour, and so this action should be used to cover this work.</p> <p>04/05: In progress.</p> <p>18/05: In progress, at minimum some clarification to the spec is needed</p> <p>01/06: Discussed to bring Mike up to speed. Solution will depend on other spec discussions.</p> <p>08/06: Still under discussion</p> <p>15/06: Will come back to this after action 140 resolved</p> <p>28/06: As above</p> <p>05/07: As above</p> <p>12/07: <a href="#">As above</a></p>
140	<p><b>Spec issue: Parsing: 'missing' v 'empty', role of initiators , default values (All)</b></p> <p>01/06: See minutes.</p> <p>08/06: Still under discussion. Tim has sent Mike a selection of data formats to guide the discussion.</p> <p>15/06: Not discussed - an extra call has been scheduled to go through this.</p> <p>28/06: A series of extra calls are being held between Mike, Steve, Tim and Steph.</p> <p>05/07: Next extra call is Wed 6th July - Steve to send invite</p> <p>12/07: <a href="#">Two more calls held. Next call is Wed 13th July.</a></p>
141	<p><b>Should text number exponent , infinity and Nan rep properties be lists ? (IBM)</b></p>

	<p>28/6: There is certainly a requirement for DFDL to handle multiple reps for these properties. If ignoreCase is not an option due to ICU then should these allow a list?</p> <p>05/07: In progress with IBM.</p> <p>12/07: <a href="#">Still with IBM</a></p>
144	<p><b>Create errata document to track spec issues (Steve)</b></p> <p>05/07: Will be kept in grid forge and publicised on OGF and Wikipedia pages. This replaces the errata list at the foot of the minutes, which will be removed when the errata document is issued.</p> <p>12/07: <a href="#">GWD Errata document created here:</a></p> <p><a href="http://forge.gridforum.org/sf/go/doc16280?nav=1">http://forge.gridforum.org/sf/go/doc16280?nav=1</a>. Work list updated below.</p>

### Closed actions

No	Action

### Deferred actions

No	Action
129	<p><b>Press release to publicise DFDL (Steve)</b></p> <p>Steve is pulling together a press release at IBM. Want to include as many contributors and interested parties as possible. NCSA are keen to be included. Also likely that US National Archive will want to be included. Mike has indicated OCO are too.</p> <p>17/11: no progress</p> <p>...</p> <p>08/12: Still no response from IBM press office</p> <p>15/12: no progress</p> <p>....</p> <p>09/03: No progress</p> <p>30/03: Making this action deferred until IBM is in a position to say something more concrete about any implementation.</p>
131	<p><b>Transformation of DFDL properties to a canonical form (Joe)</b></p> <p>08/12: Joe has produced a XSLT to transform a DFDL schema to a canonical element form. When tested it should be made available on the WG gridforge site.</p> <p>15/12: Alan tested against test dfdl schema which worked correctly (after fixing some errors in the schema)</p> <p>22/12: no update</p> <p>12/01: Joe has some defects to fix before making available on gridforge.</p> <p>19/01: There is a difficult problem to solve before Joe make the style sheet public</p> <p>26/01: Working on problems</p> <p>02/02: no progress</p> <p>09/02: As it wasn't a simple as exoected this will be treated as a low priority action</p> <p>23/02: Low priority</p> <p>09/03: Low priority</p> <p>30/03: Deferring for now</p>
066	<p><b>Investigate format for defining test cases (All)</b></p> <p>25/11: IBM to see if it is possible to publish its test case format.</p> <p>04/12: no update</p> <p>...</p> <p>17/02: IBM is willing in principle to publish the test case format and some of the test cases. May need some time to build a 'compliance suite'</p> <p>24/03: No progress</p> <p>03/03: Discussions have been taking place on the subset of tests that will be provided.</p> <p>10/03: work is progressing</p> <p>17/03: work is progressing</p> <p>31/03: work is progressing</p> <p>14/04: And XML test case format has been defined and is being tested.</p> <p>21/04. Schema for TDML defined. Need to define how this and the test cases will be made</p>

	<p>public</p> <p>05/05: Work still progressing</p> <p>12/05: Work still progressing</p> <p>02/06: Work still progressing on technical and legal considerations</p> <p>...</p> <p>25/08: Will chase to allow Daffodil access to test cases. The WG should define how implementation confirm that they 'conform to DFDL v1'</p> <p>01/09: IBM still progressing the legal aspect. Intends to publish 100 or so tests as soon as it can, ahead of a full compliance suite.</p> <p>08/09: IBM still progressing</p> <p>15/09: IBM still progressing, expect tests to be available within a few weeks</p> <p>22/09: IBM still progressing, expect tests to be available within a few weeks</p> <p>29/09: Test cases are being prepared.</p> <p>06/10: Some test cases should be available next week. Steve would like to be able to show the test case information at OGF 30.</p> <p>13/10: Still progressing</p> <p>10/11: Legal issues cleared, IBM in process of collecting 100 example test cases, ideally ones that fit the 'extended conformance' of NCSA Daffodil</p> <p>17/11: Work is progressing on verifying the test cases. It should be possible to distribute to the WG in 2 weeks.</p> <p>24/11: About half the test cases have been completed and are being reviewed internally.</p> <p>01/12: Test cases should be available shortly</p> <p>08/12: The test cases are in internal IBM review. Probably need a bit of reorganising before publication</p> <p>Stephanie gave a brief overview of the format of the test cases.</p> <p>15/12: Ruth joined the call to provide the latest status. The test cases have been updated and a draft read.me produced. Although not ready for public distribution Ruth will send them to Joe for feedback.</p> <p>22/12: Test cases were sent to Joe for initial testing which found some problems in the Daffodil parser</p> <p>12/01: All current tests use a default format which Daffodil doesn't currently support. Joe suggested that there should be test that defined the same function using different definition forms. Also suggested that default formats should be provided by the WG. This had always been the intention. Action 133 raised to track.</p> <p>19/01: There is currently no resource available in IBM to make more tests available. IBM to discuss how/if it can make a 'minimal compliance test suite' available.</p> <p>26/01: Action kicked off within IBM. There was a brief discussion about naming and organisation of test cases but no preferences were expressed</p> <p>02/02: IBM will not have the resources to develop a full test suite in the near future. Steve suggested that we produce a list of required test cases so that anyone could supply them.</p> <p>09/02: Steve had previously sent a list of areas to be tested. Please review.</p> <p>23/02: Please review Steve's list of areas to be tested</p> <p>02/03: Alan had reviewed Steve's list and we went through his comments. Agreed there is no need for separate tests for the info set or for dfdl: property lists, unions etc but comment will be added that these should be exercised during property testing.</p> <p>09/03: Alan updated the test document. Need more introduction and perhaps adopting the OGF template.</p> <p>30/03: Ownership of test document passed to Steve. This action is merged with 112 and will cover all aspects of compliance suite.</p> <p>13/04: IBM will not have time to create a compliance suite in the near future. Probably best to make this action deferred for now.</p>
