

# DFDL WG Call Minutes

This OPEN document will not be filed. It is being kept active.

## Meeting about Meetings\OGF

Project	DFDL 1.0
Meeting Date	01-Oct-13 (Tues)
Meeting Time	16:00 - 17:00

Created by Steve Hanson on 09-Mar-11

Last Modified by Steve Hanson on 08-Oct-13

## OGF DFDL Working Group Call , 1 October 2013

### Agenda

**Prepare** for your meeting by describing the objectives (both immediate and long-term, if appropriate) of the meeting; and describe key plan details.

#### 1. Daffodil Open Source Project

Status update.

#### 2. Go through public comments

There are over 40 public comments, we should go through them all, resolving if possible to do so.

#### 3. AOB

### Minutes

#### Meeting Minutes

**Reflect** on your meeting as you record all topics and issues discussed , and any tabled conversations. What went well, or what would you do differently next time? Document those so others can take advantage of your learning .

#### Attendees

Steve Hanson  
Tim Kimber  
Jonathan Cranford  
Mike Beckerle

#### Apologies

Suman Kalia

#### IPR Statement

"I acknowledge that participation in this meeting is subject to the OGF Intellectual Property Policy ."

#### Minutes

##### 1. Daffodil Open Source Project

Not discussed.

## 2. Go through public comments

The following additional public comments were discussed .

- 90: ES can not be combined with other content - **Resolved**.
- 73: Encoding error when matching regex - **Resolved**.
- 22: Inconsistent table numbering - **Resolved**.
- 88: Difference between ES and empty string literal - **Resolved**.
- 43: Formats with bit order reversed - **New action 233**.

### Meeting closed

17:30 UK

### Next regular call

Tues 8th Oct 16:00 UK

## Create Action Items

Record the to-do's and individuals assigned by entering the appropriate information in the form below . Press the "Create Action Items" button to create specific to do's that can be tracked in the assignee's Work for Me views. " All Action Items will be tracked in the Action Items and Other Meeting Documents tab .

## Action Items and Other Meeting Documents

Subject	Document Type	Created	Modified

Next action: **234**

## Actions raised at this meeting

No	Action
<b>233</b>	<b>Public comment 43: Formats with bit order reversed (Mike)</b> 1/10: <a href="http://redmine.ogf.org/boards/15/topics/43">http://redmine.ogf.org/boards/15/topics/43</a> . Mike to provide words for potential new

## Current Actions :

No	Action
066	<p><b>Investigate format for defining test cases (All)</b></p> <p>25/11: IBM to see if it is possible to publish its test case format .</p> <p>04/12: no update</p> <p>...</p> <p>17/02: IBM is willing in principle to publish the test case format and some of the test cases . May need some time to build a 'compliance suite'</p> <p>24/03: No progress</p> <p>03/03: Discussions have been taking place on the subset of tests that will be provided .</p> <p>10/03: work is progressing</p> <p>17/03: work is progressing</p> <p>31/03: work is progressing</p> <p>14/04: And XML test case format has been defined and is being tested.</p> <p>21/04: Schema for TDML defined. Need to define how this and the test cases will be made public</p> <p>05/05: Work still progressing</p> <p>12/05: Work still progressing</p> <p>02/06: Work still progressing on technical and legal considerations</p> <p>...</p> <p>25/08: Will chase to allow Daffodil access to test cases . The WG should define how implementation confirm that they 'conform to DFDL v1'</p> <p>01/09: IBM still progressing the legal aspect. Intends to publish 100 or so tests as soon as it can, ahead of a full compliance suite.</p> <p>08/09: IBM still progressing</p> <p>15/09: IBM still progressing, expect tests to be available within a few weeks</p> <p>22/09: IBM still progressing, expect tests to be available within a few weeks</p> <p>29/09: Test cases are being prepared.</p> <p>06/10: Some test cases should be available next week. Steve would like to be able to show the test case information at OGF 30.</p> <p>13/10: Still progressing</p> <p>10/11: Legal issues cleared, IBM in process of collecting 100 example test cases, ideally ones that fit the 'extended conformance' of NCSA Daffodil</p> <p>17/11: Work is progressing on verifying the test cases. It should be possible to distribute to the WG in 2 weeks.</p> <p>24/11: About half the test cases have been completed and are being reviewed internally.</p> <p>01/12: Test cases should be available shortly</p> <p>08/12: The test cases are in internal IBM review. Probably need a bit of reorganising before publication</p> <p>Stephanie gave a brief overview of the format of the test cases.</p> <p>15/12: Ruth joined the call to provide the latest status. The test cases have been updated and a draft read.me produced. Although not ready for public distribution Ruth will send them to Joe for feedback.</p> <p>22/12: Test cases were sent to Joe for initial testing which found some problems in the Daffodil parser</p> <p>12/01: All current tests use a default format whih Daffodil doesn't currently support. Joe suggested that there should be test that defined the same function using different definition forms. Also suggested that default formats should be provided by the WG. This had always been the intention. Action 133 raised to track.</p> <p>19/01: There is currently no resource available in IBM to make more tests available . IBM to discuss how/if it can make a 'minimal compliance test suite' available.</p> <p>26/01: Action kicked off within IBM. There was a brief discussion abot naming and organisation</p>

	<p>of test cases but no preferences were expressed</p> <p>02/02: IBM will not have the resources to develop a full test suite in the near future . Steve suggested that we produce a list of required test cases so that anyone could supply them .</p> <p>09/02: Steve had previously sent a list of areas to be tested . Please review .</p> <p>23/02: Please review Steve's list of areas to be tested</p> <p>02/03: Alan had reviewed Steve's list and we went through his comments . Agreed there is no need for separate tests for the infoset or for dfdl: property lists, unions etc but comment will be added that these should be exercised during property testing .</p> <p>09/03: Alan updated the test document . Need more introduction and perhaps adopting the OGF template .</p> <p>30/03: Ownership of test document passed to Steve . This action is merged with 112 and will cover all aspects of compliance suite .</p> <p>13/04: IBM will not have time to create a compliance suite in the near future . Probably best to make this action deferred for now .</p> <p>...</p> <p>10/07/2012: Discussed schemes to create interchangeable tests . Ideally need a DFDL defined error code per failure, in conjunction with specific inserts .</p> <p>...</p> <p>26/3/2013: Resurrecting deferred action .</p> <p>We have got to the point where it makes sense to converge the IBM DFDL and Daffodil variations of .tdml file .</p> <p>Steve to seek permission from IBM to make the list of IBM DFDL error messages available to DFDL WG .</p> <p>...</p> <p><b>24/5: No further progress.</b></p> <p>28/5: Mike summarised the status of Daffodil's tdml runner . Since IBM shared the tdml format, Daffodil has added a) bit file support with in-line comments; b) embedded schema; c) failure checking by multiple string matching . IBM has added a) some flags that map to parser API 'features' such as optional checks; b) code to handle illegal XML characters . 1200 parser test cases written for Daffodil, about 60 of the original IBM shared tests now pass in Daffodil . Steve will email OGF and ask if there is an approved process for demonstrating that multiple implementations generate the same set of test results . To progress with a shared tdml format, IBM will need to get legal approval to view the Daffodil source test cases , Steve to kick this off . Mark noted that IBM's tdml format has evolved in order to make the infoset comparison easier , Mark will see whether the shared tests use the latest version .</p> <p>4/6: Steve has emailed OGF for guidance, reply received . Experience documents needed to verify conformance, but there is not a requirement to have executable tests . However, a set of executable tests is what we need ideally .</p> <p>Discussed error messages and identifiers for different errors and what the granularity should be . Steve has asked for permission to send the IBM DFDL error messages to the DFDL WG , they should be used as a starting point . Need to agree what constitutes the minimum content of an error message .</p> <p>...</p> <p><b>1/10: No further progress</b></p>
<b>200</b>	<p><b>Establish recommended practices for pushing changes to GitHub (Mike)</b></p> <p>29/1: Mike will talk to Tresys who have used Git a lot .</p> <p>5/2: Mike to talk to Tresys this week, Tim has sent some links .</p> <p>12/2: Information sent by Mike, Steve to review .</p> <p>...</p> <p><b>1/10: No further progress</b></p>
<b>220</b>	<p><b>Review reworked information on bit fields (Steve)</b></p> <p>20/8: Major changes to presentation rather than content, but a full review is needed even so .</p> <p>28/8: Mike and Steve collaborating on getting this into the spec and reviewed . Spotted an issue in passing with the grammar, the RightPadOrFill region could actually contain pad characters and fill bytes, for the text &amp; lengthUnits 'bytes' combination . <b>Erratum taken .</b></p> <p>3/9: Draft r14.5 contains updates . Went through the remaining open comments . Most can be</p>

	<p>closed now, a few remain and will be handled in public comment, specifically</p> <ul style="list-style-type: none"> <li>- adding lengthUnits 'bits' for packed calendars;</li> <li>- documenting the endOfParent case where RightFill can be encountered.</li> </ul> <p>10/9: No progress  17/9: Public comment 26 raised for packed calendars issue (<a href="http://redmine.ogf.org/boards/15/topics/26">http://redmine.ogf.org/boards/15/topics/26</a>)  Public comment 27 raised for endOfParent issue (<a href="http://redmine.ogf.org/boards/15/topics/27">http://redmine.ogf.org/boards/15/topics/27</a>)  24/9: Agreed to allow packed calendars with lengthUnits 'bits'. <b>Public comment 26 resolved</b>.  Mike to add a reply to public comment 27.  1/10: <a href="#">Mike added reply, Steve to provide words for section 12.3.7.3.</a></p>
221	<p><b>Ensure 'nil' is handled by DFDL expressions (Mike)</b></p> <p>20/8: Possible problem with 'nil' and expressions. Needs investigation.  28/8: No further progress. Unlikely to make the published draft.  3/9: No progress - deferred until public comment  10/9: No progress  17/9: Public comment 28 raised (<a href="http://redmine.ogf.org/boards/15/topics/28">http://redmine.ogf.org/boards/15/topics/28</a>)  24/9: Requires some detailed investigation  1/10: <a href="#">Proposal from Mike to treat nil as a separate info set item member 'nilled'. Review for next week.</a></p>
222	<p><b>Improve some of the wording used in separator suppression description (All)</b></p> <p>28/8: Mike has some concerns with the accuracy of the wording, see email thread.  3/9: No progress - deferred until public comment  10/9: No progress  17/9: Public comment to be raised  24/9: With Mike to raise  1/10: <a href="#">Public comment 67 raised (<a href="http://redmine.ogf.org/boards/15/topics/67">http://redmine.ogf.org/boards/15/topics/67</a>) with suggested wording. Mike to add inputValueCalc case.</a></p>
224	<p><b>Add section for implementation defined limits (Jonathan)</b></p> <p>3/9: Several places in the spec cite this, should be grouped. Currently partially listed in section 2.6.  Also note distinction between 'implementation defined' and 'implementation dependent'. Check spec for correct usage.  Resolve during public comment.  10/9: No progress  17/9: Jonathan sent a reference to the W3C XProc standard where the distinction is made clear. Jonathan will go through the spec and gather everything that is implementation defined/dependent. Public comment to be raised  24/9: With Jonathan to raise.  1/10: <a href="#">Public comment 97 raised (<a href="http://redmine.ogf.org/boards/15/topics/97">http://redmine.ogf.org/boards/15/topics/97</a>)</a></p>
225	<p><b>Consistent terminology for describing text data (Mike)</b></p> <p>3/9: Ensure spec uses 'textual' and other agreed terms in a consistent way.  Resolve during public comment.  10/9: No progress  17/9: Public comment to be raised  24/9: With Mike to raise  1/10: <a href="#">Public comment 66 raised (<a href="http://redmine.ogf.org/boards/15/topics/66">http://redmine.ogf.org/boards/15/topics/66</a>). Make sure that all uses of text/textual data are not ambiguous with the use of 'text representation'; consider improving glossary to define 'Text' in terms of anything requiring dfdl:encoding to be set.</a></p>
227	<p><b>Clarify words for erratum 2.100 in sections 12.3.7 and dfdl:textPadKind (Steve)</b></p> <p>17/9: Steve to propose updated words.  Public comment 25 raised (<a href="http://redmine.ogf.org/boards/15/topics/25">http://redmine.ogf.org/boards/15/topics/25</a>).  24/9: With Steve who will review all of 12.3.7.  1/10: <a href="#">Still with Steve to review</a></p>
228	<p><b>Review set of tutorial lessons (All)</b></p> <p>17/9: Lesson 1 proposes a set of lessons, needs reviewing as over 2 years old.  ...</p>

	1/10: No progress
229	<b>Should evaluation of multiple newVariableInstance and multiple setVariable be deterministic ? (All)</b> 24/9: Public comment 39 raised ( <a href="http://redmine.ogf.org/boards/15/topics/39">http://redmine.ogf.org/boards/15/topics/39</a> ) 1/10: Mike sent proposal by email. Decided that order should be deterministic across multiple annotations points in the same resolved set, innermost first. Mike to update public comment 39.
230	<b>Should WSP* be allowed when ES is not allowed ? (Steve)</b> 24/9: Public comment 40 raised ( <a href="http://redmine.ogf.org/boards/15/topics/40">http://redmine.ogf.org/boards/15/topics/40</a> ). Steve to make proposal. 1/10: Public comment 40 updated. Mike to modify Steve's proposal so that WSP* not allowed when scanning for delimiters.
231	<b>Attend NIST Data Symposium (Mike, Jonathan)</b> 24/9: Check availability to attend the symposium in Gaithersburg , MD, to present DFDL. 1/10: No definite availability , need to decide by Friday Oct 4th as abstract and bio needed.

### Closed actions

No	Action
232	<b>Update Wikipedia and OGF web pages to publicise Public Comment (Steve)</b> 24/9: With Steve to update. 1/10: <b>Closed.</b> Wikipedia updated, OGF DFDL home page updated, Redmine News item added.
226	<b>Clarify that %ES; is intended to be used on its own (Tim)</b> 10/9: Remaining issue from action 172. How best to reflect this is the syntax table for DFDL string literal. Resolve during public comment. 17/9: Public comment to be raised 24/9: With Tim to raise and resolve 1/10: <b>Closed.</b> Public comment 90 raised ( <a href="http://redmine.ogf.org/boards/15/topics/90">http://redmine.ogf.org/boards/15/topics/90</a> ). DFDL string literal grammar to be changed. <b>Resolved.</b>
223	<b>How best to document ICU time zone symbol fallbacks (Steve)</b> 3/9: Steve to contact ICU. Resolve during public comment. 10/9: Steve raised an ICU ticket. DFDL spec needs to make a statement about time zones that refers to Unicode LDML spec, in a similar way we refer externally to encodings or calendar languages. 17/9: Public comment to be raised 24/9: Public comment 41 raised ( <a href="http://redmine.ogf.org/boards/15/topics/41">http://redmine.ogf.org/boards/15/topics/41</a> ). Steve to propose resolution. 1/10: <b>Closed.</b> Public comment 41 updated with proposed resolution. Agreed with proposal. <b>Resolved.</b>

### Deferred actions

No	Action
129	<b>Press release to publicise DFDL (Steve)</b> Steve is pulling together a press release at IBM. Want to include as many contributors and interested parties as possible. NCSA are keen to be included. Also likely that US National Archive will want to be included. Mike has indicated OCO are too. 17/11: no progress ... 08/12: Still no response from IBM press office 15/12: no progress .... 09/03: No progress 30/03: Making this action deferred until IBM is in a position to say something more concrete

	about any implementation.
<b>131</b>	<b>Transformation of DFDL properties to a canonical form (Joe)</b> 08/12: Joe has produced a XSLT to transform a DFDL schema to a canonical element form. When tested it should be made available on the WG gidforge site. 15/12: Alan tested against test dfdl schema which worked correctly (after fixing some errors in the schema) 22/12: no update 12/01: Joe has some defects to fix before making available on gridforge . 19/01: There is a difficult problem to solve before Joe make the style sheet public 26/01: Working on problems 02/02: no progress 09/02: As it wasn't a simple as exoected this will be treated as a low priority action 23/02: Low prioity 09/03: Low priority 30/03: Deferring for now

#### Work items:

No	Item	Owner	Target	Status
045	Resolve public comments <a href="#">and incorporate into spec</a>	All	2013-10-22	Pending
