

NAREGI-PSE: Problem Solving Environment with ACS based on Grid Services

Sept. 2006

NAREGI-PSE Group

National Institute of Informatics

Fujitsu Limited

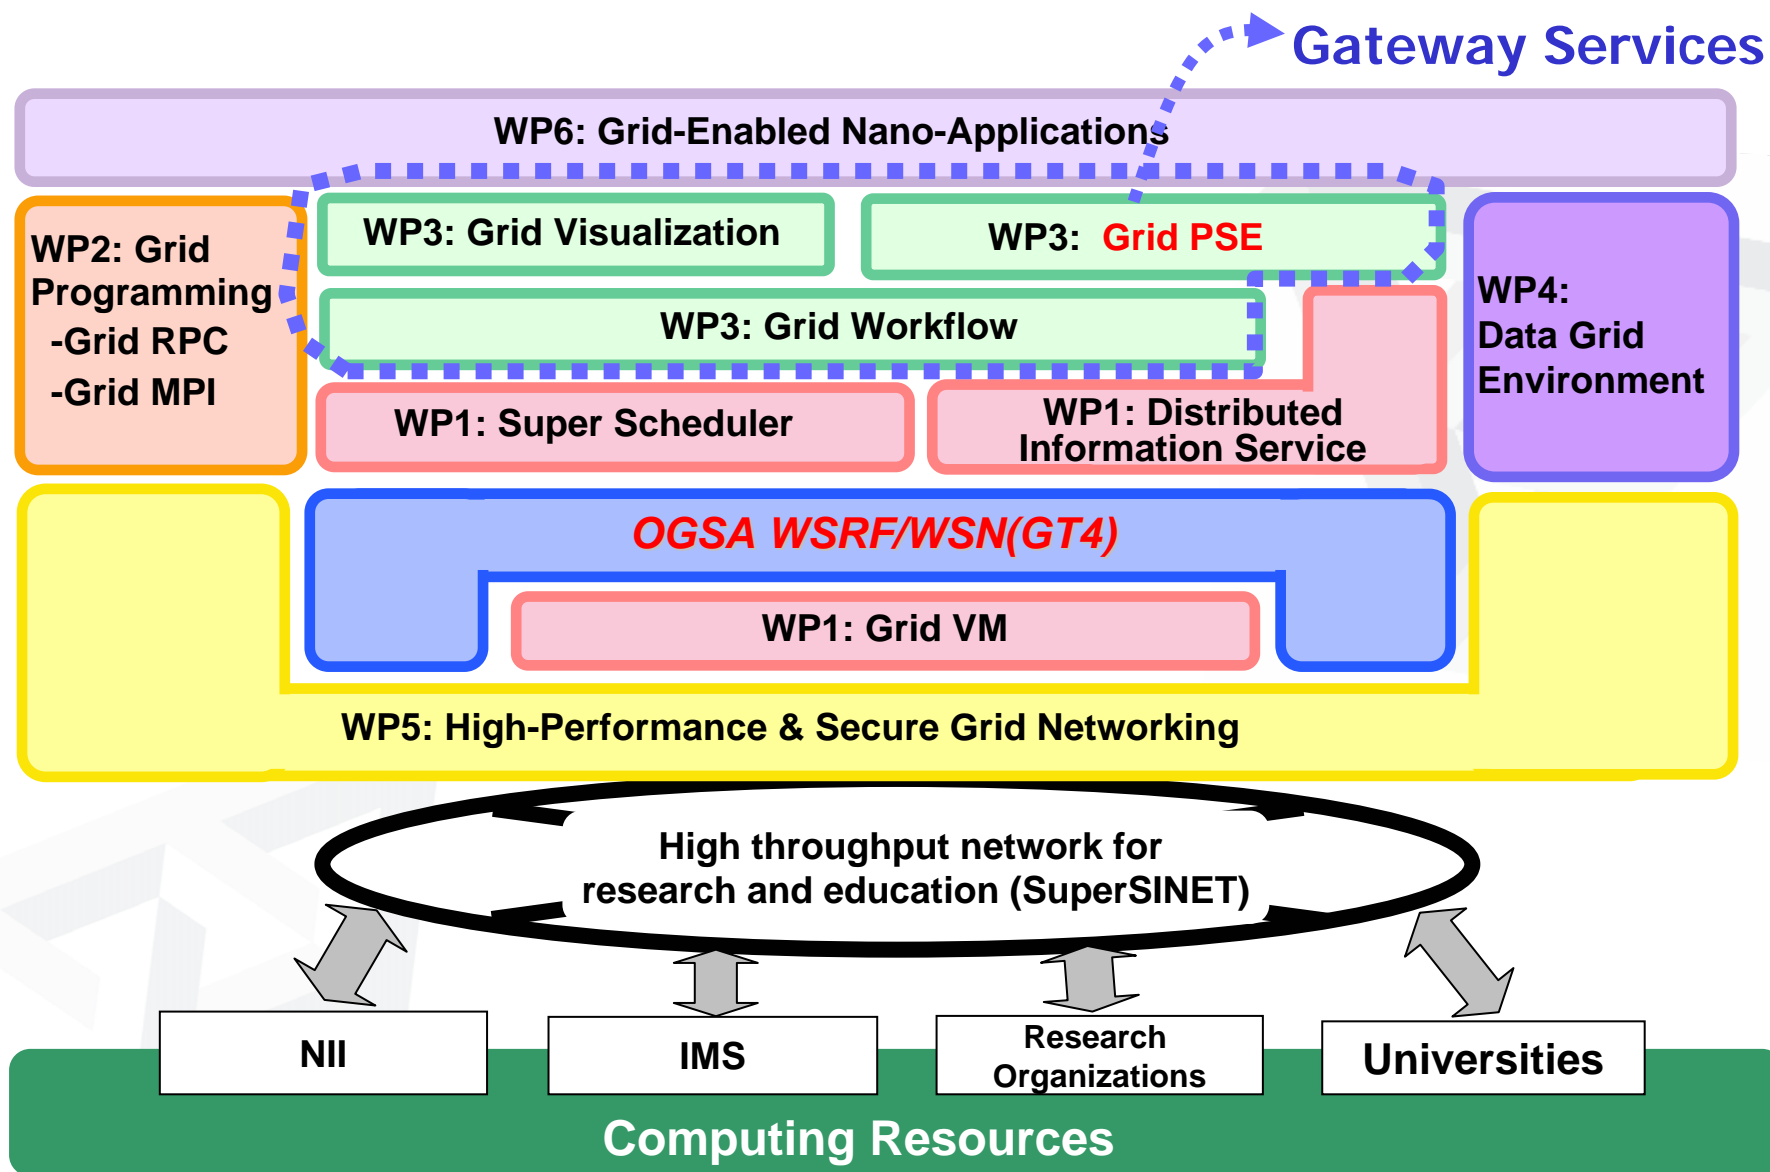

Utsunomiya University

■ What is NAREGI? <http://www.naregi.org/>

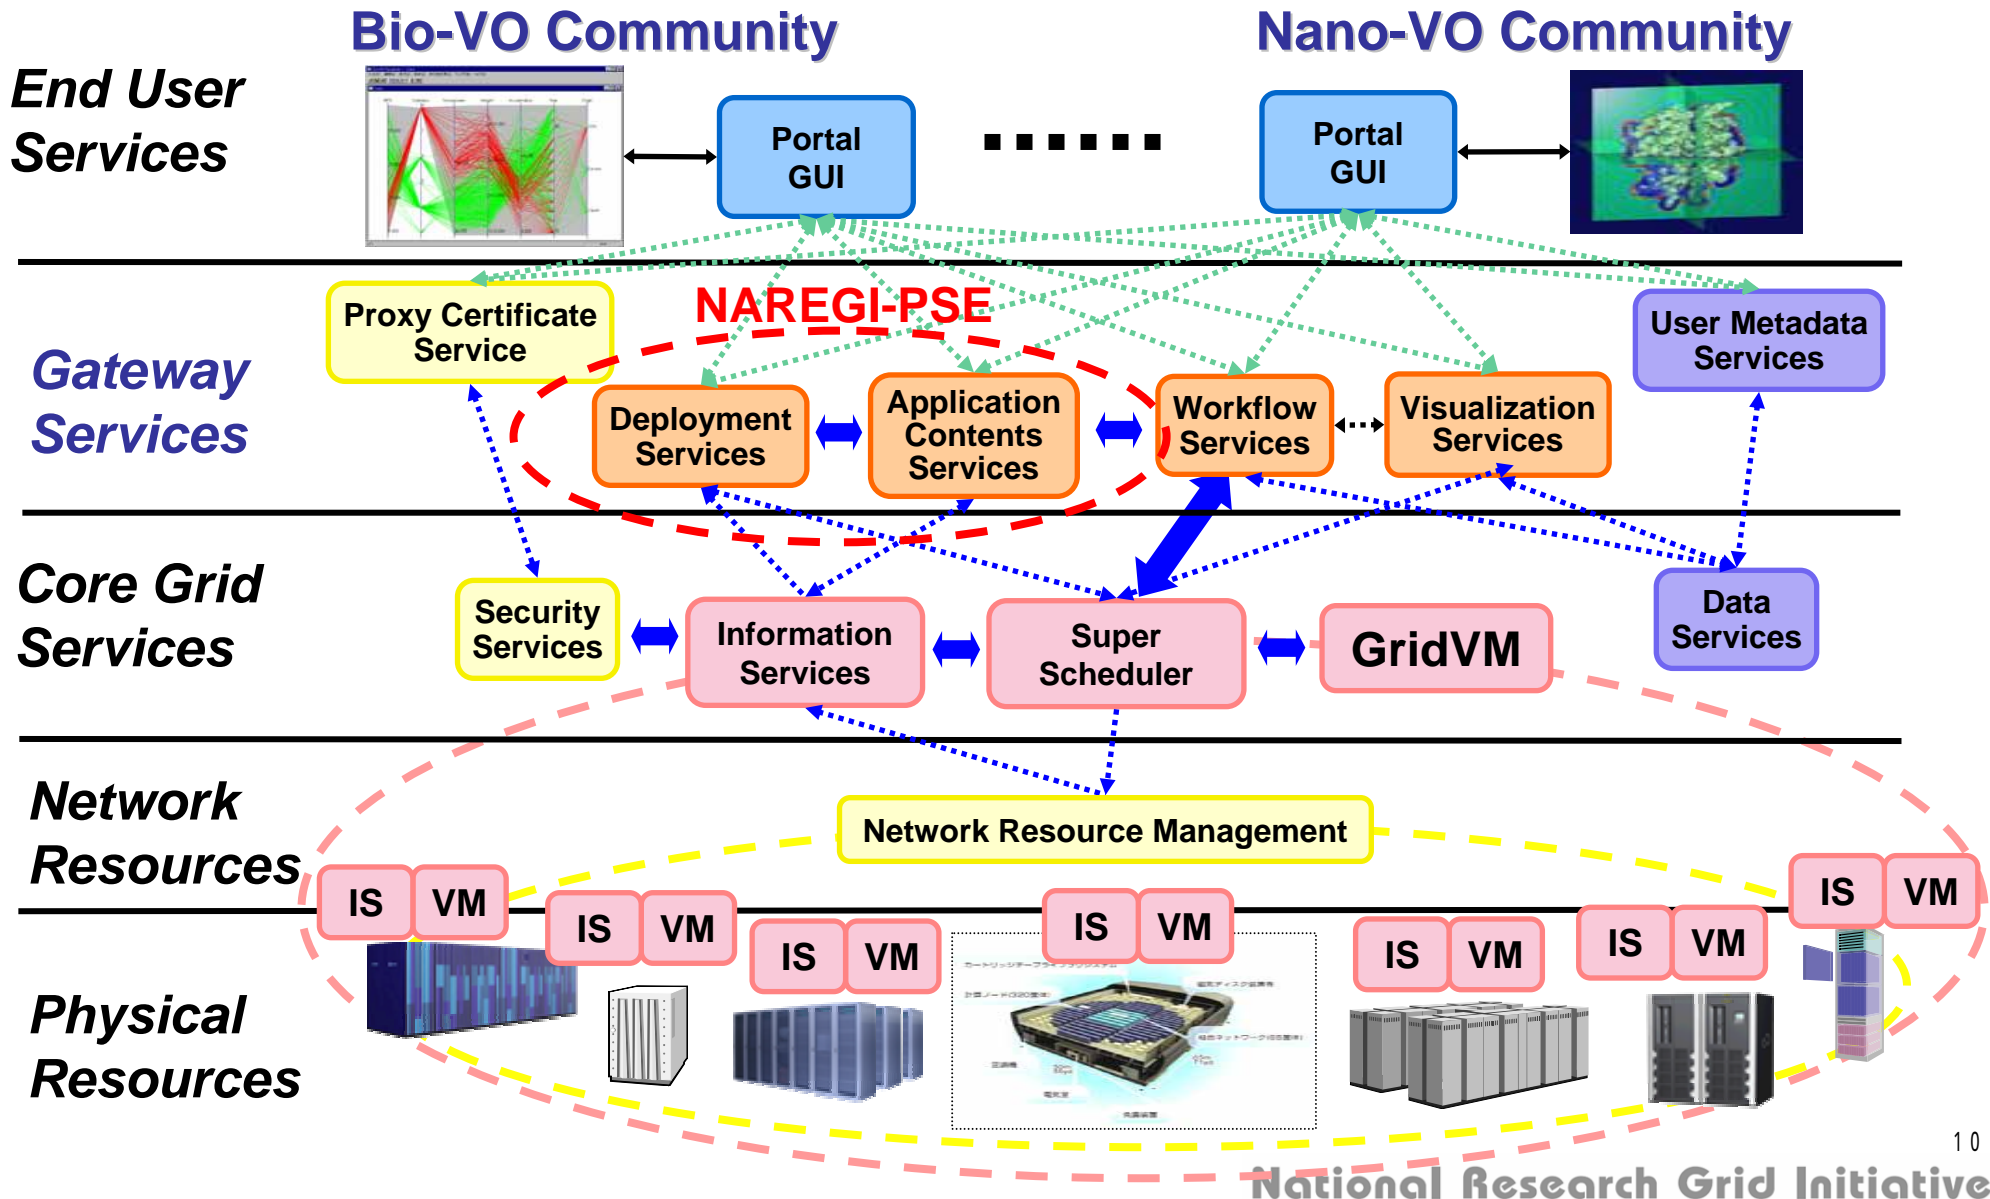

■ Research Themes in NAREGI

- WP1: Resource Management in the Grid Environment
(Scheduler, Broker, Auditing, Accounting, Grid VM)
- WP2: Grid Programming Environment
(Grid RPC, Grid MPI)
- WP3: Grid Application Environment (User-Level Grid Tools)
(Workflow GUI, Visualization Tools, *Grid PSE*)
- WP4: Data Grid Environment
- WP5: High-performance & Secure Grid Networking
(Traffic Measurement, Optimal Routing Algorithms, Robust TCP/IP Protocols)
- WP6: Grid-Enabled Nano Applications
(Parallel Structure, Granularity, Resource Requirement, Coupled Simulation)

NAREGI Software Stack

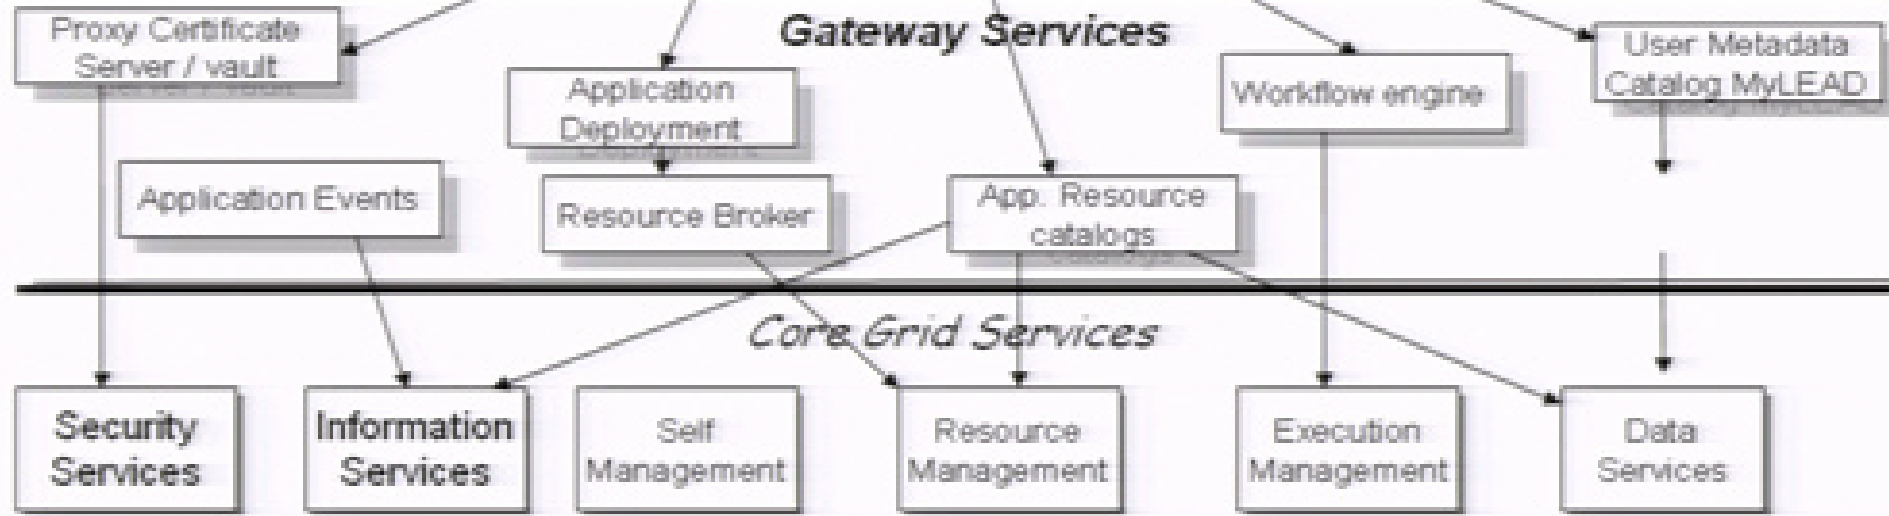

NAREGI Middleware Services Architecture

The screenshot displays the LEAD web application interface. The main area features a map of the United States with a color-coded overlay indicating the status of various regions. A legend on the left side of the map shows color-coded boxes for different status levels. On the right side, there is a table with columns for 'Region', 'Status', and 'Last Update'. The table lists several regions with their corresponding status and the date of the last update.

Region	Status	Last Update
Alaska	Green	10/10/2013
Arizona	Green	10/10/2013
Arkansas	Green	10/10/2013
California	Green	10/10/2013
Colorado	Green	10/10/2013
Connecticut	Green	10/10/2013
Delaware	Green	10/10/2013
District of Columbia	Green	10/10/2013
Florida	Green	10/10/2013
Georgia	Green	10/10/2013
Hawaii	Green	10/10/2013
Idaho	Green	10/10/2013
Illinois	Green	10/10/2013
Indiana	Green	10/10/2013
Iowa	Green	10/10/2013
Kansas	Green	10/10/2013
Kentucky	Green	10/10/2013
Louisiana	Green	10/10/2013
Maine	Green	10/10/2013
Maryland	Green	10/10/2013
Massachusetts	Green	10/10/2013
Michigan	Green	10/10/2013
Minnesota	Green	10/10/2013
Mississippi	Green	10/10/2013
Missouri	Green	10/10/2013
Montana	Green	10/10/2013
Nebraska	Green	10/10/2013
Nevada	Green	10/10/2013
New Hampshire	Green	10/10/2013
New Jersey	Green	10/10/2013
New Mexico	Green	10/10/2013
New York	Green	10/10/2013
North Carolina	Green	10/10/2013

Ohio	Green	10/10/2013
Oklahoma	Green	10/10/2013
Oregon	Green	10/10/2013
Pennsylvania	Green	10/10/2013
Rhode Island	Green	10/10/2013
South Carolina	Green	10/10/2013
South Dakota	Green	10/10/2013
Tennessee	Green	10/10/2013
Texas	Green	10/10/2013
Utah	Green	10/10/2013
Vermont	Green	10/10/2013
Virginia	Green	10/10/2013
Washington	Green	10/10/2013
West Virginia	Green	10/10/2013
Wisconsin	Green	10/10/2013
Wyoming	Green	10/10/2013

LEAD Grid
Portal Server

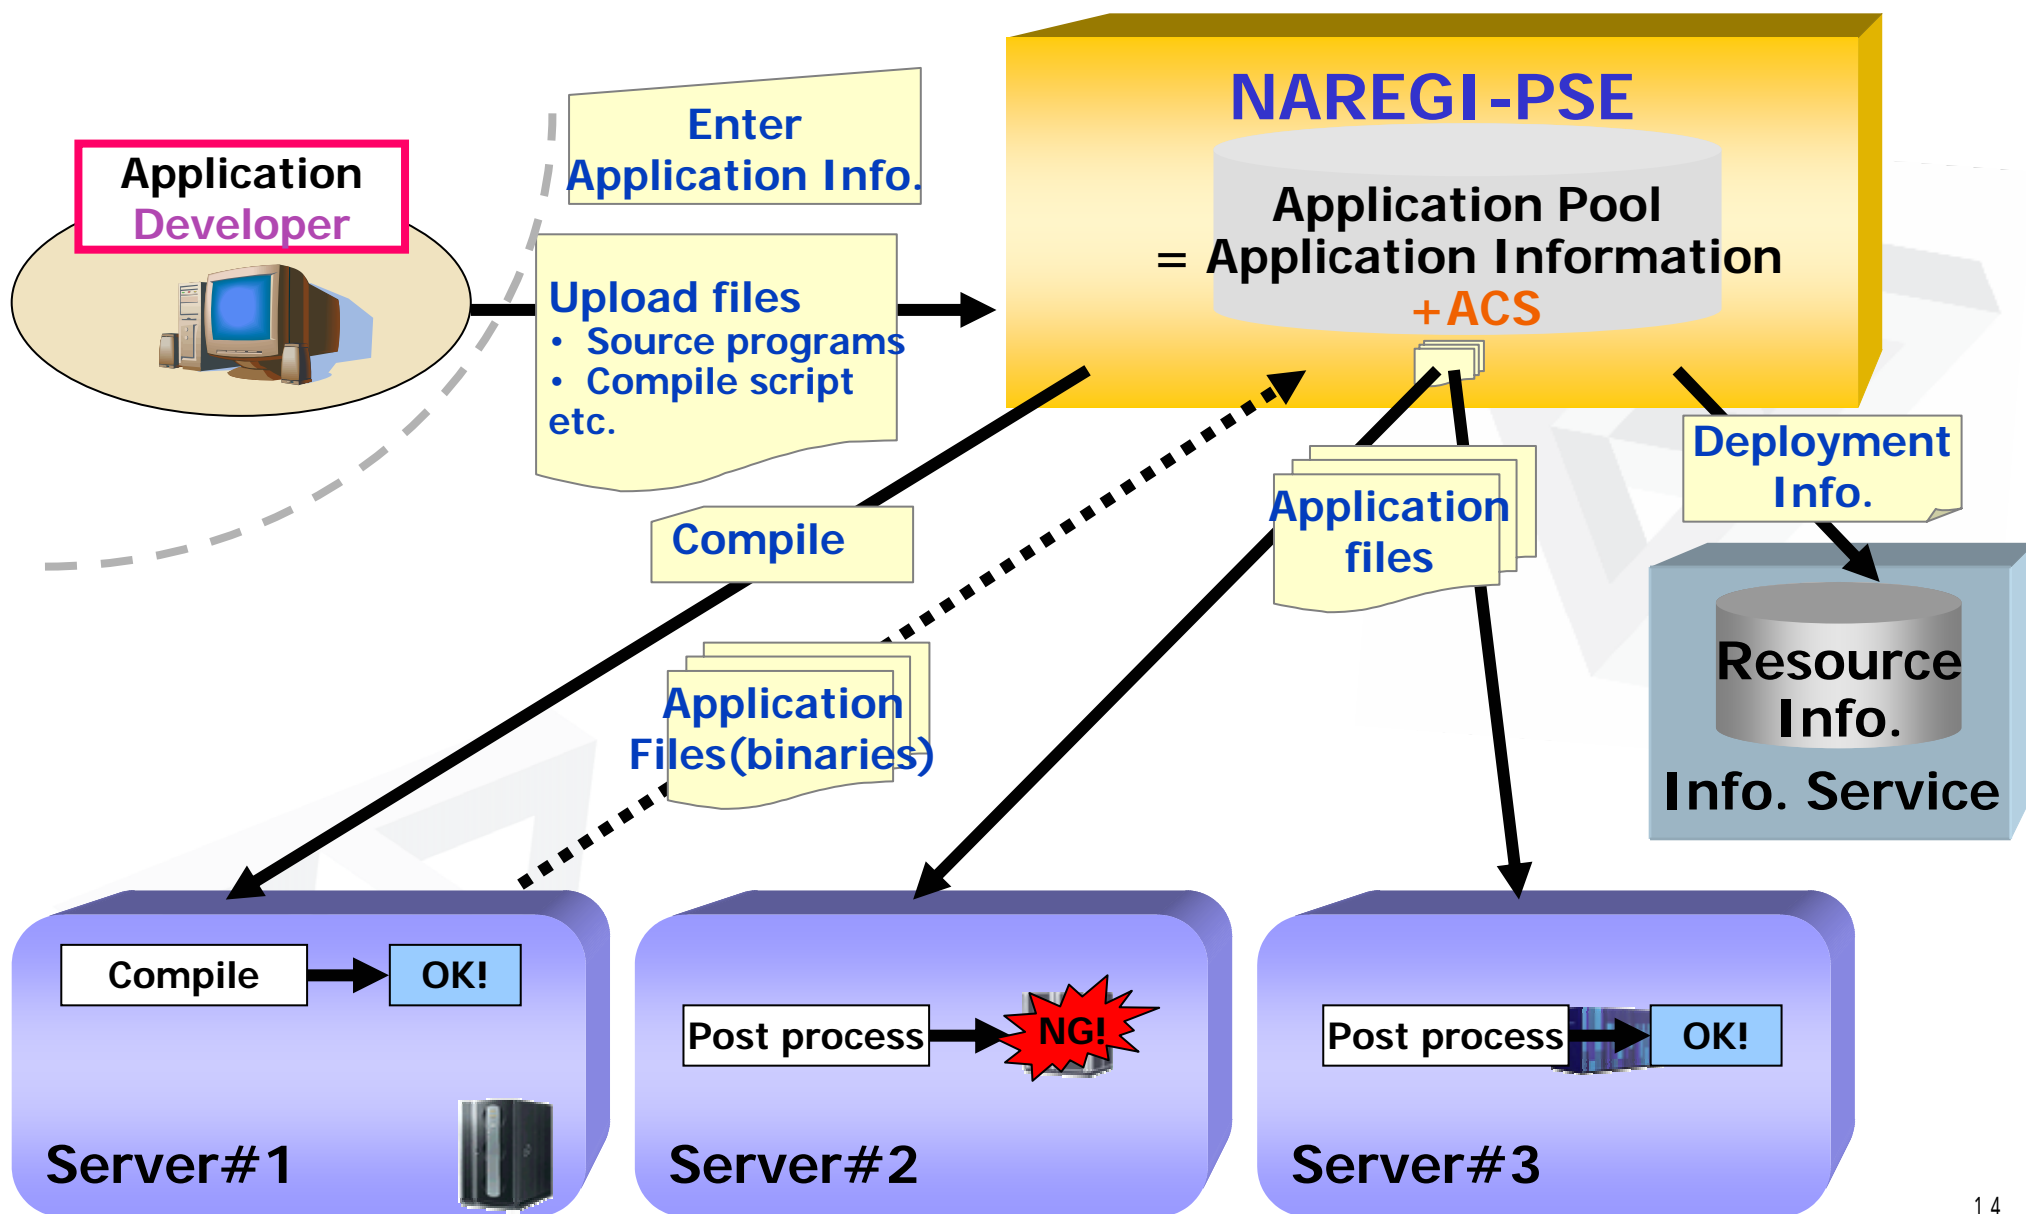

Physical Resource Layer

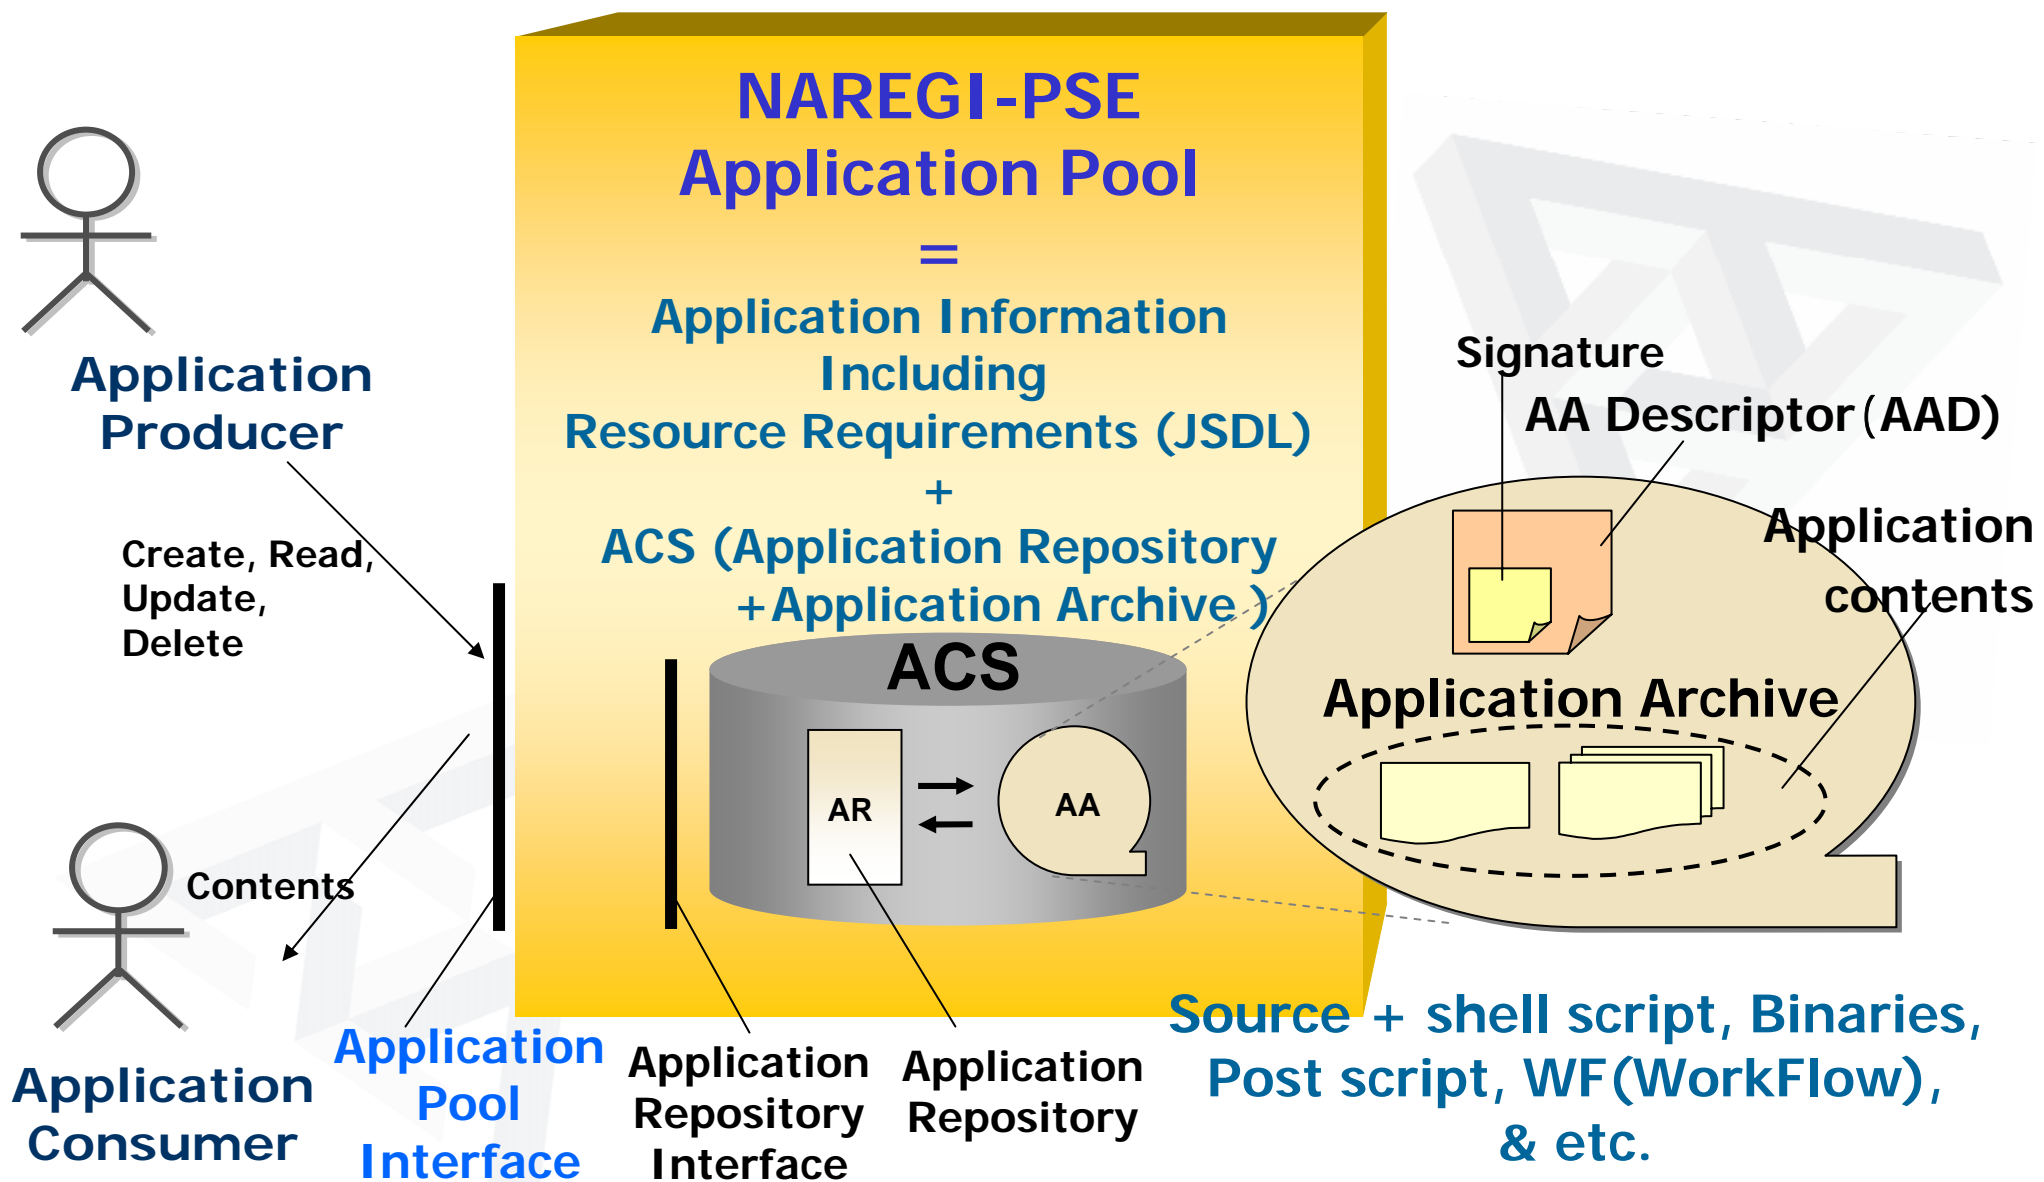

NAREGI-PSE Concept

- Provide a framework to distributed users' applications on grid
 - Users can register, deploy and retrieve applications by using NAREGI-PSE for real-time collaborations.
 - Application developers distribute and share his/her applications by research community members.
 - Application users easy to use the latest research applications without compile and test run.
- Focus on a legacy application
 - Deploy application binaries for specific targets machine.
 - Compile source programs, if needed

Usage I (Compile, Deploy and Register)

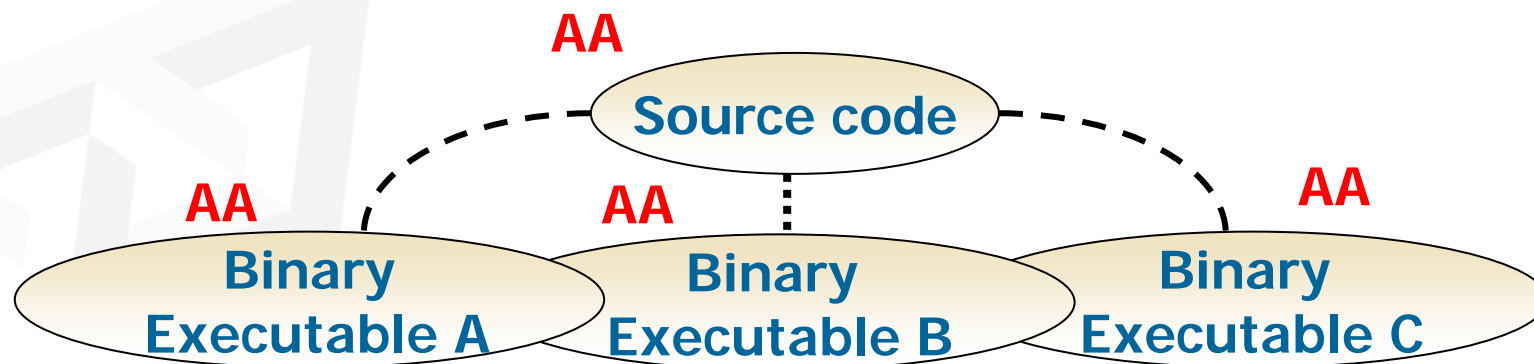

Structure of Application Pool

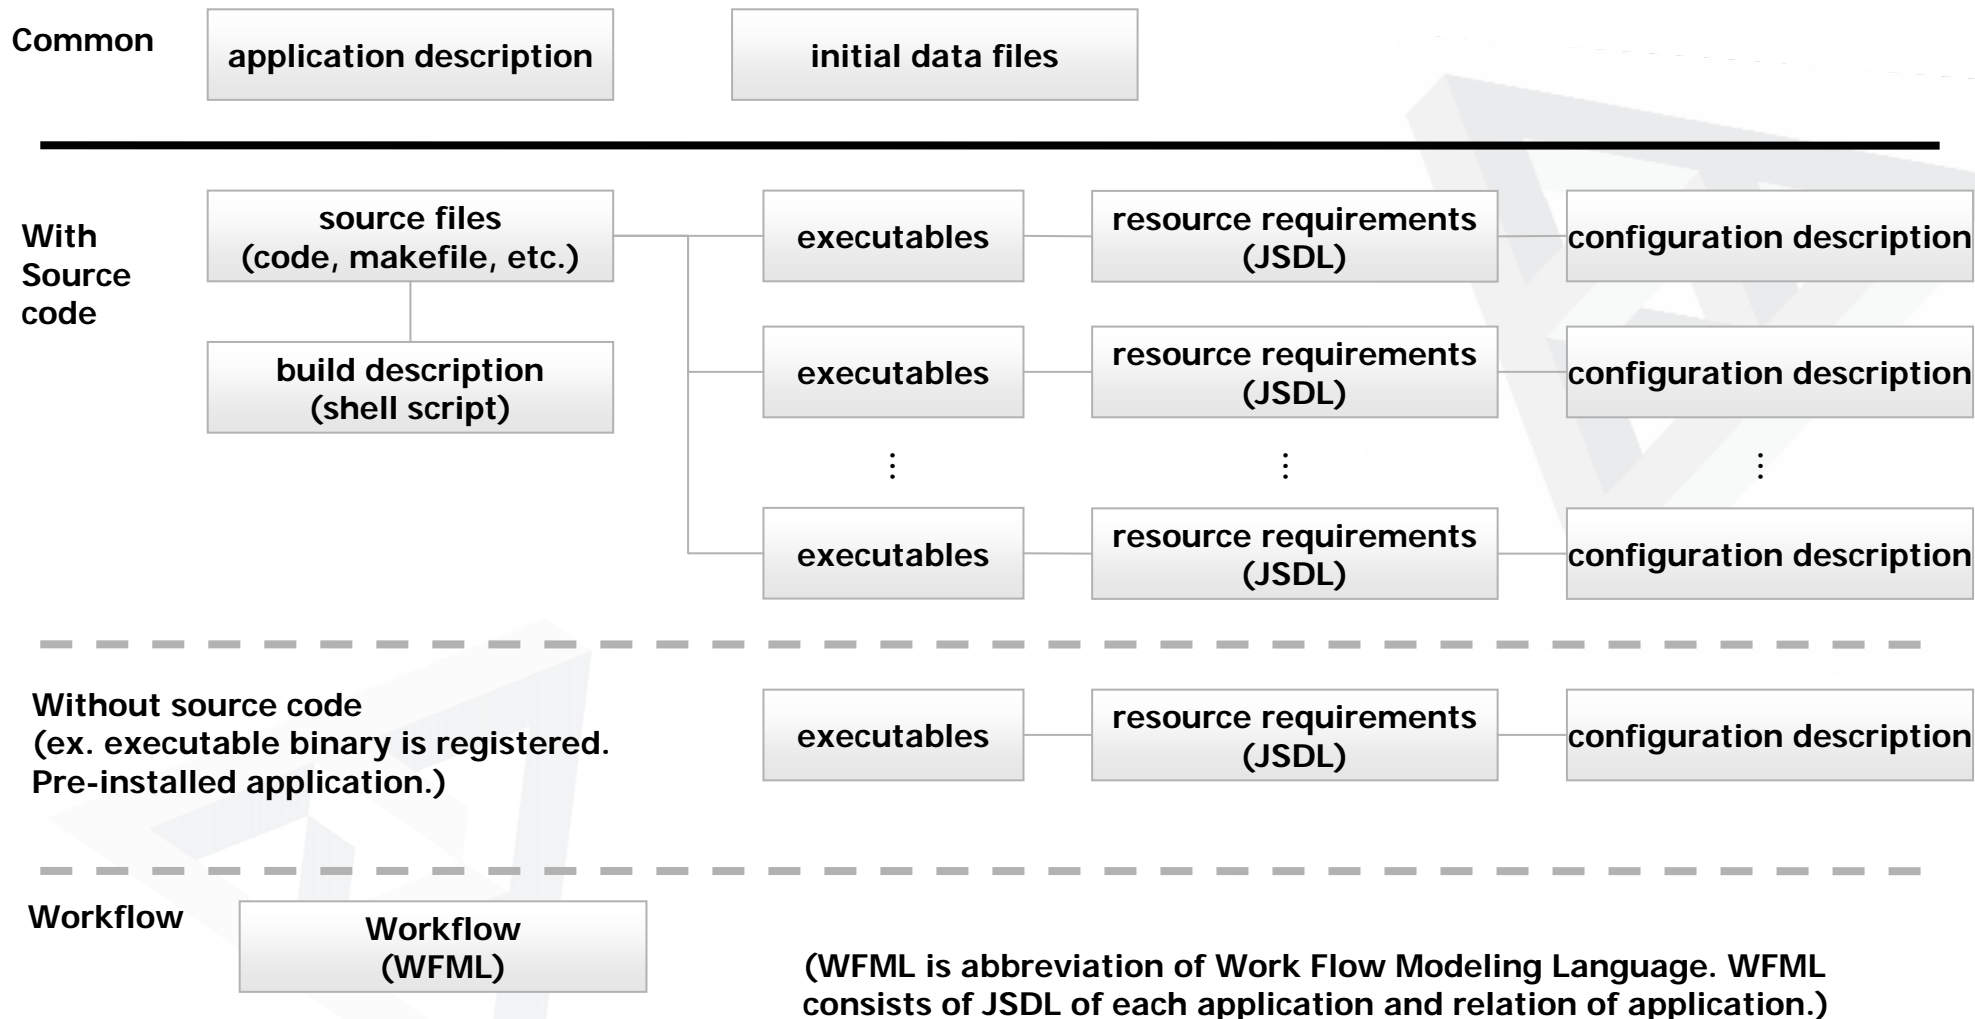

■ ACS

- NAREGI-PSE stores application files into Application Repository (ACS-AA) standardized by OGF.
- ACS-AA can access from other OGSA-EMS standard Grid systems for Application Archives.
- The application with a different resource requirement is stored as another application archive.
- AA relation may be important to describe a relation between a source code and binaries.

Application Model of NAREGI-PSE

Resource Requirements

- Resource requirements of applications in NAREGI-PSE are:
 - Described based on Job Submission Description Language (JSDL).
- PSE refers to resource requirements of the applications:
 - to determine what nodes/systems are used for compilation/deployment.
 - Application user can copy JSDL from other application in PSE. They can modify JSDL to match their specific purposes in the Grid Workflow.

Job Submission Description Languages (JSDL)

Application element is extended:

POSIXApplication

MPIApplicationSpecific

ApplicationResource

CheckPointableApplication

JSDL Overview in GGF drafts:

<JobDefinition>

<JobDescription>

<JobIdentification ... />

<Application ... />

<Resources... />

<DataStaging ... />

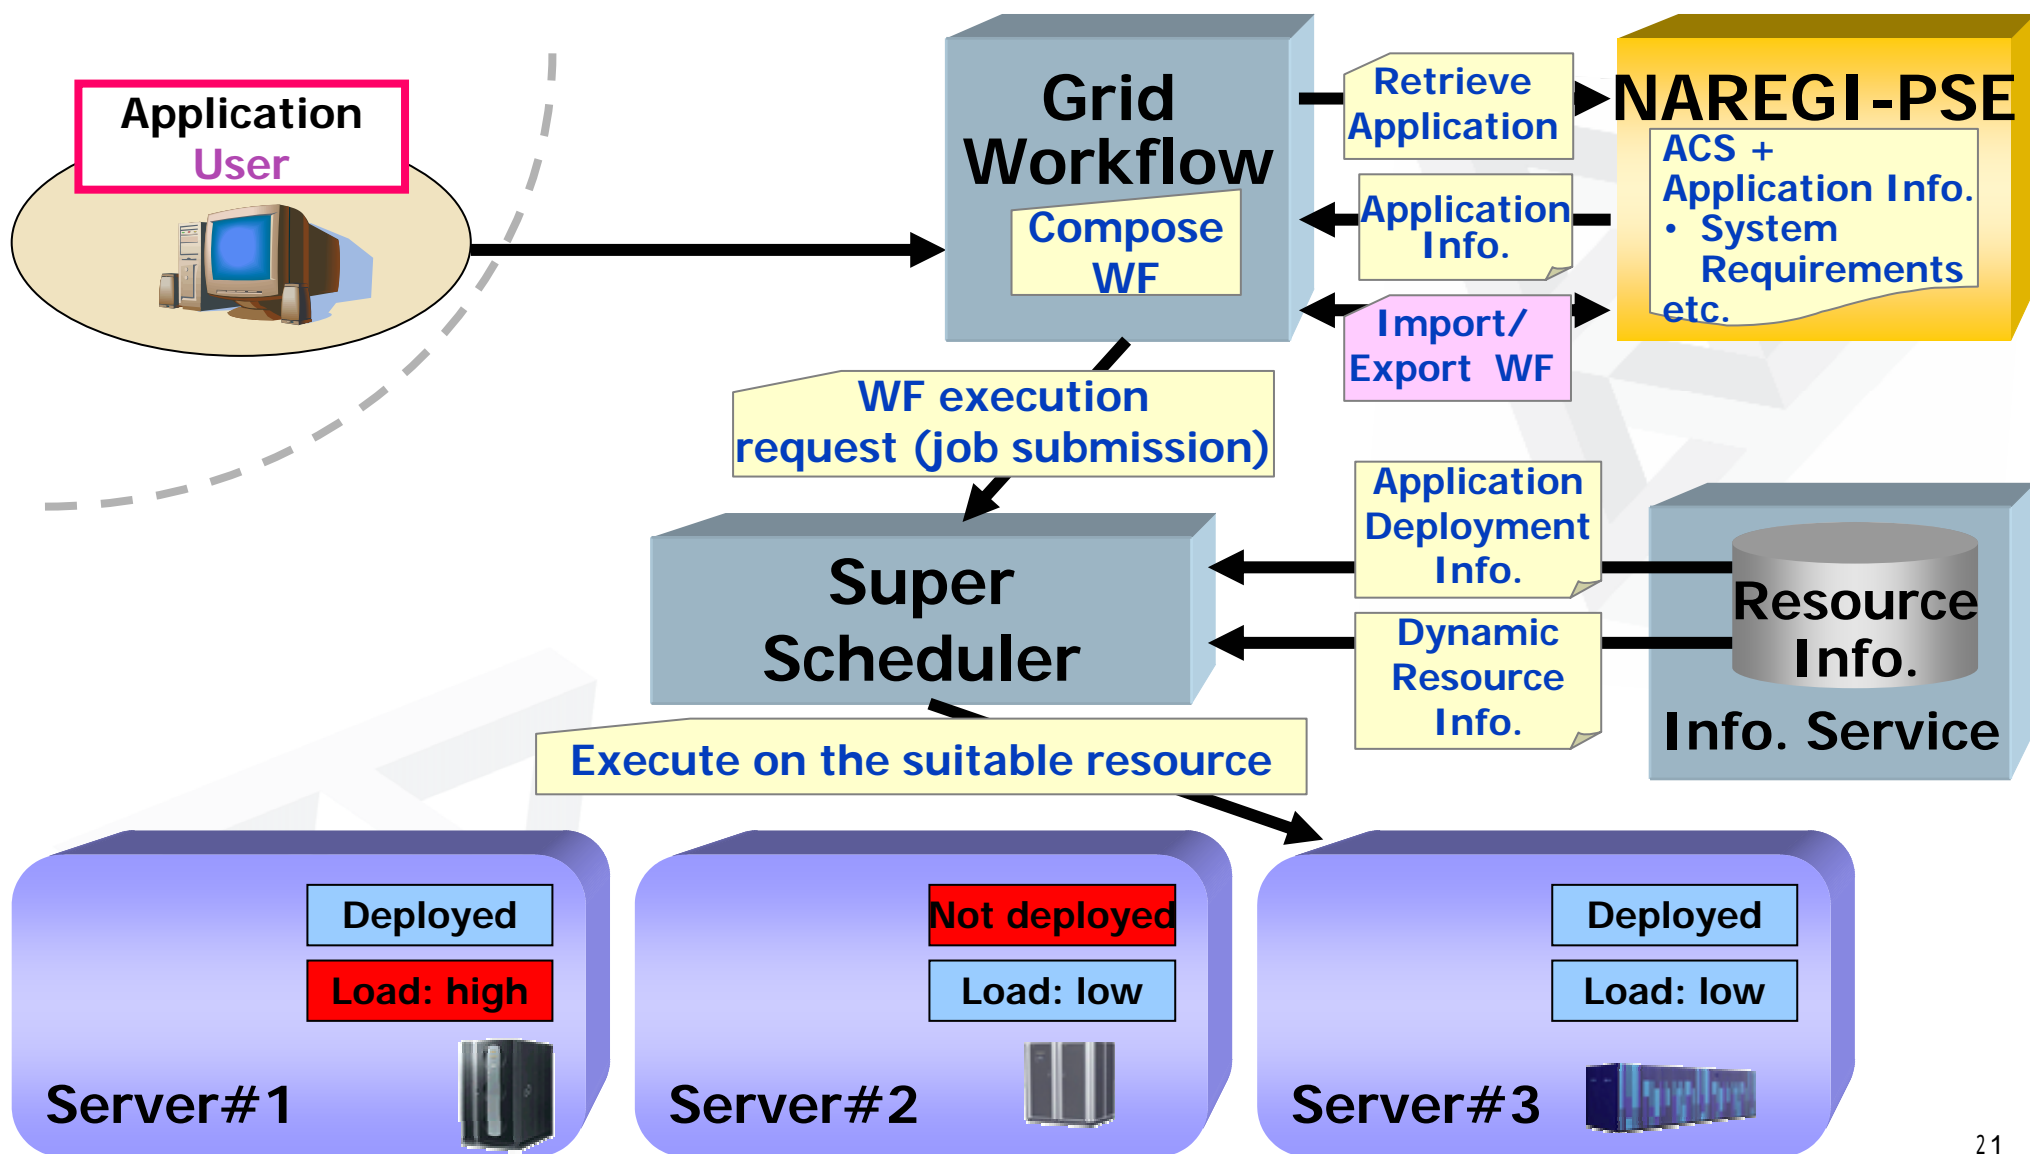

</JobDescription>

</JobDefinition>

**DataStaging element
is not used. Described
in Workflow.**

Conclusions

- **NAREGI Beta version** released at May, 2006.
 - Download Site ; <http://www.naregi.org/download/>
- **Beta version of NAREGI-PSE** enables users
 - register their own applications,
 - compile and deploy the applications on the grid,
 - retrieve the application information,
 - and export the application information to Grid Workflow for execution.
 - import and export the workflow from Grid Workflow as a complicated application scenario.
- **NAREGI-PSE** is implemented with **ACS** for real-time collaborations in research communities on VOs.

Thank you!
