Grid Scheduling Ontology - GSO**
- **GSO draft charter for a BOF meeting at GGF7**

GGF Intellectual Property Rights

Since GGF5 meeting GGF follows the IETF rules for Intellectual property rights.

For further details please see the web-page:

www.globalgridforum.org/

State of the work

**Changes resulting from discussion at GGF5
included in the dictionary**

Dictionary WG Web-site online:

www.fz-juelich.de/zam/RD/coop/ggf/sd-wg.html

including a html version of the dictionary.

(link to site also at

www.mcs.anl.gov/~jms/ggf-sched/WG/sd-wg.html

and on the GGF pages)

**Current document as pdf available at the
web-site.**

Changes

Change advance reservation definition:

Advance reservation is the process of negotiating the (possibly limited or restricted) delegation of particular resource capabilities over a defined time interval from the resource owner to the requester.

Add terms for scheduling of network resources (GARA)

Add terms for GridEngine

other changes?

Submission to the reviewing process

Grid Forum Working Draft: GWD-i

Dictionary -> Ontology

Why?

- Clarify usage and hierarchy of terms
- Help in understanding the dictionary terms
- enable tool builders to incorporate the ontology into tools
-

How?
