

## Two GLUE2 use cases:

- EMI-ES job management interface
- ARC Middleware LDAP, XML, client libraries

Florido Paganelli, Lund University

OGF36, GLUE2 Workshop, Chicago,  
9th October 2012

# Outline

- The EMI-ES information model
  - The Resource document
  - The Activity document
- ARC Middleware and GLUE2
  - ARC LDAP GLUE2 rendering
  - ARC XML GLUE2 documents
  - ARC client libraries

# EMI-ES Information Model

- Five port-types:

- **ActivityCreation**

Only a URL to Access ResourceInfo

- **ActivityManagement**

Single Activity information

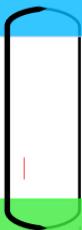

- Delegation

- **ActivityInfo**

Information port types

- **ResourceInfo**

Need both for full info!

# EMI-ES Information Model

- Five port-types:

• **ActivityCreation**

Only a URL to Access ResourceInfo

• **ActivityManagement**

Single Activity information

• Delegation

• **ActivityInfo**

Information port types

• **ResourceInfo**

Need both for full info!

# EMI-ES Info Model facts

- WS based
- Uses the GLUE2 jargon whenever possible
- Each **PortType** represented as a **GLUE2 Endpoint**
- **ResourceInfo → Resource Document:**  
Based on GLUE2 XML schema (hierarchical)
- **ActivityInfo → Activity Document:**  
A GLUE2-like document (mostly flat)

# Resource Document Structure

```
<GetResourceInfoResponse>

Adoption of flat GLUE2 XML schema might make this document a GLUE2 document.

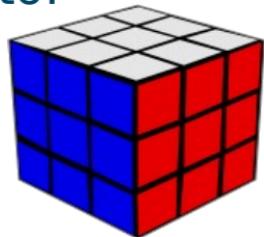

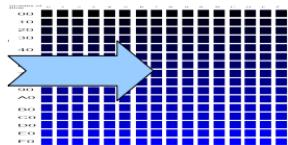

# ARC LDAP/XML GLUE2

# ARC XML chunk

```

```

- A client library for accessing grid resources.
- Provides a simple but powerful API to:
  - **discover services**
  - **create and manage jobs**
  - handle data transfers
  - handle user credentials
- Features a modular architecture: it uses **plugins** to be able to talk to different services.

- **ServiceEndpointRetriever**  
queries information system for GLUE2 Endpoints  
**index-levels/registry services**
- **TargetInformationRetriever**  
queries information system **local-levels (Ces)**  
for GLUE2 Endpoints
- **JobRetrievers**  
retrieves list of jobs, obtains information on  
specific jobs represented as  
**ComputingActivities**.

# Currently Developed

These are the retrievers that support GLUE2 information.

## ServiceInformationRetriever

- EMIR (EMI Registry)

## TargetInformationRetriever

- GLUE2 LDAP
- ARC GLUE2 WSRF
- EMI-ES ResourceInfo

## JobRetrievers

- LDAP GLUE2
- EMI-ES ActivityInfo/ActivityManager

# THANKS!
