

Open Grid Services Infrastructure (OGSI-WG)  
Approved 25-February 2002

Chairs: Steve Tuecke (ANL), Jeff Frey (IBM)

Purpose:

Review and refine the Grid Service Specification and other documents that derive from this specification, including OGSA-infrastructure-related technical specifications and supporting informational documents.

Milestones:

Initial draft documents:

- \* Grid Service Specification
- \* The Physiology of the Grid: An Open Grid Services Architecture for Distributed Systems Integration

Expected additional documents:

- \* Network protocol binding specifications (at least one by GGF5)

Other possible documents:

- \* How J2EE should host Grid services
- \* Other hosting environment definitions (C, etc.)
- \* Client side language bindings for WSDL (Java, C, etc.)
