June 1, 2004 CMM-WG teleconference minutes

1 Early discussion

(1) Note taker assignment: Fred

(2) Roll call
- Fred Maciel
- David Snelling
- Jem Treadwell
- Latha Srinivasan

(3) Approve the minutes of the last teleconference: no comments, approved

2 Gap analysis document

- Fred: what does "factory pattern" mean in WSRF? David: explains. Fred: is there anything needed for manageability of factory services? David: could ask factory what it creates. Or more complex (everything that matches a certain pattern in a query). Fred: is it a gap that such functions are not defined? David: yes. That pattern is not codified in WSRF. WSRF backed away from an operation name, but the pattern is still there.
- Review of text that is still missing. Jem and Latha working on items asked by Fred.
- Schedule for this week: merge tomorrow, perhaps teleconference on Friday, depending on the status of the document.
- Fred: OGSA glossary will be submitted to the GGF? Jem: yes, in parallel with OGSA document.

3 Discussion on Jay's document

- Background: Jay Unger sent a proposal to the OGSA-WG mailing list proposing the OGSA-WG to analyze and choose resource models for OGSA.
- Fred: we can create high-level requirements, but at the current stage they will not be detailed . Latha: need high-level requirements and a usecase point of view. E.g. VOs, jobs, containers, etc., we need to take the VO through analysis and definition. Need the breakdown of the services.
- Latha: UCWG has a lot to do with OGSA, we need to be close to them. Need to do in parallel to drive requirements.
- Latha: could just add the need to do the above our document. Fred: OK.
- David: it's not going to happen fast. Don't know how it will develop.

4 Next teleconference

- Perhaps next Friday, announcement to be posted later.
