

OGSA Teleconference - December 10, 2007 – Interoperability

Attendees:

Hiro Kishimoto
Mark Morgan
Dave Snelling
Steven Newhouse
Vivian Lee
Joseph Bester
Andrew
Andreas Savva

OGSA WS-RF interop

Draft minute approval without modification of Sept 27, 2007

Interop document under preparation by Vivian.

Who is ready to put up an endpoint

Status

UVA – Genesis II not ready

USMT – not read (Fujitsu)

Unicore – not ready

Globus – not ready. There are two implementations a C and a Java implementations, neither is ready.

GridSam - ?

Univa - ?

Action item for the Wiki - delete Univa from the table. (Dave)

Discuss whether we want to document whether groups or projects intend to continue to support the interop – i.e., will it become part of the source tree.

Action for OGSA group – Discuss, what is the point of interops? Without commitment to fold into the source who cares? (Andrew)

Action for Wiki editor as to level of adoption for implementation (Dave)

Action - Schedule a slot for interop role call discussion at the F2F in London. (Hiro)

Action - Try to do the interop the week of January 22, 2008.
